

Modern interpretation of a classic picnic table

FAQ - Tablebench

Use

Which features does the Tablebench offer me?

The Tablebench is a modern interpretation of the classic picnic table. The existing design has been cut in half, adding value and multifunctionality in its function. The Tablebench can be used in different settings, making it a smart and versatile design. Because of the added back support on one side of the tabletop, it can be used in both directions: as a bench or as a table.

Safety

What safety hazards does the Tablebench pose?

Besides edges and corners that can be bumped into, there are no particular safety hazards with the Tablebench.

Maintenance

What do I need to pay attention to when maintaining the Tablebench?

The Tablebench is available in two wood options. They both require different maintenance:

Accoya: Spray the wood twice a year with cleaning vinegar and let it stand for three days. After this, clean with a brush and water. To make it easier to clean the table, you can treat it with a coating. However, this does not prolong the lifespan of the Accoya wood. Do not use a high-pressure cleaner.

Larch: Treat the wood with an oil treatment about twice a year. This will slow down the aging process of the wood and help with easier cleaning. Always apply a thin layer of oil. Do not use a high-pressure cleaner.

How important is maintenance to the Tablebench?

As with any wooden furniture, we recommend cleaning and maintaining the wood regularly to prolong the lifespan of the Tablebench.

Weather conditions

Which weather conditions will the Tablebench withstand?

The Tablebench is designed for outdoor use and will withstand daily weather conditions. Leaving it outside, however, will slowly cause the wood to gray. If you want to prevent this natural aging of the wood, the Tablebench can be treated with a wood oil before use and as maintenance.

Material

What materials does the Tablebench consist of?

Accoya wood, electrophoretic painted and powder coated steel.

Larch wood, electro galvanized and powdercoated steel.

How much does the Tablebench weigh?

Tablebench 2-seater Accoya/Larch: 25 kg / 55 lbs

Tablebench 4-seater Accoya/Larch: 40 kg / 88 lbs.

Is the Tablebench easy to move?

The Tablebench is easy to take a hold of and lift. We do recommend lifting the Tablebench with more than one person.

Packaging

How will the Tablebench be packaged?

The Tablebench is delivered in two flat pack boxes.

What packaging materials are used?

Cardboard.

What are the dimensions of the packaging?

Tablebench 2-seater: 75 x 72 x 7,5 cm & 114 x 38 x 11 cm

Tablebench 4-seater: 75 x 72 x 7,5 cm & 214 x 38 x 11 cm
